CPCS - A36 Lorry Loader (Experienced)

Certification

This course will give delegates a CPCS Red Trained Operator card (on successful completion of CPCS Technical Tests).

Trained Operator Card (RED)

The Trained Operator Card confirms a level of core skills, knowledge and understanding that can be applied in the workplace until measured as competent against national standards. Experienced and able operators may hold a Trained Operator Card whilst being measured against national standards through an SVQ or NVQ.

Once you've obtained your Red CPCS Trained Operator Card, it will last for 2 years. During these 2 years you must work towards and achieve your NVQ in Plant Operations to upgrade to a Blue CPCS Competence Card.

Competent Operator Card (BLUE)

The Competent Operator Card tells the observer that the holder has demonstrated a level of health and safety awareness through the CITB Health, safety and environment test, underpinning knowledge previously through a CPCS theory test, operating ability previously through a CPCS practical test and operating competence on the type of plant (evidenced by an SVQ or NVQ or employer confirmation of competence).
