

IPAF Harness Inspection (HI) Half Day

Course Aim

This course provides the essential knowledge and practical application for the statutory Inspection of Harnesses, lanyards and associated ancillary PFPE equipment for use in a MEWP.

Successful delegates will:

Demonstrate competence in conducting periodic and interim inspections of harnesses and lanyards for use in a MEWP.

Demonstrate how to maintain associated records of inspections.

Who Should Attend?

Prerequisites

In order to attend this course, delegates must have successfully completed the IPAF Harness Awareness and User course and hold valid certificates for both.

IPAF Harness Inspection training is essential for anyone who will personally conduct statutory inspections on behalf of an organisation.

This course is also available as a full day course that incorporates Harness Awareness, User and Inspection.

Certification

Upon successful completion of this course, delegates will receive a certificate valid for 5 years.

Course Duration

This is a half-day course.

Agenda
