

Timber Fire Door – Installation, Repair and Maintenance

Course Aim

In this 1-day course delegates will gain an understanding of the essential aspects of fire doors, including regulations, testing, and evidence of performance, as well as the design, construction, installation, maintenance, and repair of timber fire doors.

Who Should Attend?

This course is aimed at experienced delegates who are involved with the installation and maintenance of timber and/or metal doors.

Course Duration

This is a 1 day course.

Maximum Delegates

Maximum attendees: 12 delegates.

Certification

This course is for raising awareness only and does not lead to any third-party certification scheme.

This training course is recognised by DHF and can be used as Continuous Professional Development (CPD) evidence when applying for a CSCS card* when using the DHF Partner Scheme.

*Criteria and evidence vary depending on the card type applied for.

Agenda

Topics covered within the Timber Fire Door course include:

- The fundamentals of fire doors
- Regulations, testing and evidence of performance
- Timber fire doors
- The design and construction of timber fire doors
- Performance characteristics of timber fire doors
- Installation of timber fire doors
- Repair & maintenance of timber fire doors

Summary of learning: As part of a flexible training approach, a Q&A session is delivered at the end of a virtual or in-person classroom course.
