NEBOSH - Health & Safety at Work (HSW)

Course Aim

This industry leading NEBOSH course provides delegates with knowledge on risk assessments and ways to control common workplace hazards such as fire, lifting and carrying, work equipment, electrical safety, hazardous substances and transport.

Who Should Attend?

Delegates who need to understand the principles of health and safety as part of their job.

Course Duration

This is a 3 day course.

Certification

Delegates are assessed by a multiple choice examination and a practical risk assessment which tests their ability to put into practice the knowledge gained during the course. A Unit Certificate is issued denoting successful achievement of each unit.

A Certificate Parchment is issued on successful completion of the two units.

This course is delivered in partnership with Phoenix Health & Safety.

Centre number 614

Agenda

- The foundations of process safety
- Systems to prevent loss of containment
- Common risks and controls in the process safety industry
- Plant integrity
- Emergency response
- Hazards and controls associated with hazardous substances
- Control of emissions
- Environmental risk assessments (impact assessment)
- The foundations of health and safety
- The responsibility for health and safety
- Health and safety risk assessment and control
- Hazards and controls associated with work equipment
- Transport safety
- Hazards and controls associated with electricity
- Fire safety
- Hazards and controls associated with manual handling and repetitive movement
- Hazards and controls associated with the working environment
